Hilliary Frank is currently a 2nd Year PhD student at the University of California - San Diego studying computational and theoretical chemistry under Francesco Paesani. Her research focuses on understanding water dynamics inside porous materials. Born and raised in the Bronx, Hilliary completed her undergraduate degree at CUNY Lehman College in Chemistry located in Bronx, New York. Hilliary during her undergraduate degree, participated in summer research experiences including the National Science Foundation Research for Undergraduates (REU) as well as conducted research on campus with Gustavo Lopez. After graduate school, Hilliary hopes to work as a researcher and continue promote STEM careers to underrepresented communities.
