## Physics Peer Mentor Aidan Seban

---

Hello everyone, my name is Aidan, and I am very excited to be a Physics 196 peer mentor this semester.

I am an Electrical Engineering major, and plan to someday work in the aerospace industry designing new aircraft. I will be applying for transfer this semester and will have my last semester at Mesa college in the spring.

I have been using the peer mentoring program for the past few semesters to help me in passing difficult STEM classes. Now that I am a part of the program, I am excited to be able to give back and help other students.

I am also a military veteran and have on-campus involvement at the veteran's center. During my time in the military, I worked as an Aviation Meteorologist where physics was a big part of the job.

A fun fact about me is that I really enjoy playing my guitar and making music!

I look forward to meeting and working with you! Please don't ever hesitate to ask questions or ask for help, physics can be a very challenging subject and trying to learn all of the material alone will only make that journey harder on yourself. It takes a village!
