Equity, Excellence, Éxito

Biology Peer Mentor Ivy Cubero

Hello, my name is Ivy Cubero.

I am a biology major with hopes to transfer to UCSD. When I receive my degree I hope to become a professor of Human Anatomy and Physiology.

In my free time I focus on my bodybuilding dreams, my nutrition, video games, and reading.

Looking to start a Dungeons and Dragons campaign as well here at Mesa college with the club!

It is my second semester being a peer mentor and I really look forward to every opportunity I get to work with other students ! Looking forward to a semester of learning and achievements with my fellow peers!
