

SAN DIEGO MESA COLLEGE

Equity, Excellence, Éxito

Biology Peer Mentor Teresa Rentel

Hi, my name is Teresa and I am excited to be a peer mentor for BIO 210A this fall!

Next year I plan on applying to transfer to a UC school to study biochemistry. My career goals involve pursuing a graduate degree and working as a medical professional.

I appreciate all of the resources that Mesa College has to offer and I hope to provide you with a welcoming and friendly space for your learning.

Outside of school, I am working on obtaining my patient care technician certification to gain more experience in patient centered care. In my free time, I

enjoy going on walks, reading, and trying new cuisines! A fun fact about me is that German is my first language and I have visited 12 countries!

I look forward to meeting all of you and let's have a great semester!
